Ecopetrol to restart fracking work in the La Luna shale and negotiates 10 years of Venezuelan gas NEW

Ecopetrol said it will resume fracking-based exploration in the La Luna formation in the Middle Magdalena Valley and is updating prospectivity with existing seismic and well data. It is also negotiating a 10-year Venezuelan gas deal, starting at 50 million cubic feet per day via the Antonio Ricaurte pipeline.

Colombia's ANLA drops three environmental requirements for the Komodo-1 offshore well

A resolution of October 29 removes the prior approval of each specific environmental management plan, the outside opinions on contingency plans and an expert advisory group. The Ecopetrol–Anadarko ultra-deepwater well is planned in block COL-1, off Santa Marta.

GeoPark and Hocol's first well in Llanos 86 flows more than 600 bpd

The well was drilled to just over 7,000 feet in eight and a half days. GeoPark and Hocol, an Ecopetrol subsidiary, each hold 50% of the block, awarded in 2019. Technical studies are still needed before the result is formally declared a discovery.
